Welcome to your custom-designed dream home! This place has been meticulously prepared just for you, with fresh paint and refinished hardwood floors throughout that give it a better-than-new feel. The four garage bays feature a freshly cured, durable epoxy finish, perfect for showcasing your sports car.

Step into the mudroom where you can comfortably kick off your shoes and store your winter gear. Guests will appreciate the covered entryway as they wait for you to greet them. Inside, there's plenty of space to gather around the kitchen island or grab a glass of wine from the wine bar and relax by the fire in either the living room or great room.

For those who work from home, the double glass doors separate your home office from household activities. Need two home offices instead of five bedrooms? No problem—the first floor includes an extra bedroom perfect for that use, along with ensuite guest quarters.

Upstairs, you'll find two more bedrooms, a main bath, a finished bonus room, and an incredible primary suite. This suite is spacious enough for dancing, with a sitting room, multiple closets, double vanities, an oversized tile shower, and a charming Juliette balcony where you can enjoy your morning coffee while watching wildlife wander by.

To top it off, this home includes a putting green, a whole-house generator, and beautifully lit cupolas that create a picturesque scene at night.
