If the answer to any of the items in Section 3 is yes, explain (attach additional sheets if necessary):

(Diseased Trees) There are some trees that have died or look stressed. We have never had an official diagnosis, so don't know if it was oak wilt or stress from the freeze and ice storm of 2022. We have removed many dead trees. We have planted 2 Sunset maple trees in the front yard to replace live oaks that were removed.

(Previous Roof Repairs) See below concerning complete roof replacement in 2023.

(Water Damage Not Due to a Flood Event) In April 2023, we had a major hailstorm that damaged the existing roof enough to warrant a full replacement. We replaced it with a standing seam metal roof. During the replacement in June of 2023, while a section of the roof was removed, a rain/hailstorm came overnight and caused water to enter the main part of the house. The water damage affected the wood floor and some of the sheet rock. All was replaced and covered by insurance. Also ServePro was engaged to remediate and provide anti-mold treatment.

*A single blockable main drain may cause a suction entrapment hazard for an individual.
